Redux

# Illia Vinivitin

Frontend Developer at Alaris Labs  
Barcelona, Catalonia, Spain

## Summary

I am a Frontend Developer at Alaris Labs with a focus on creating functional, efficient, and user-friendly web applications. My expertise lies in React.js, Redux, and SASS, where I consistently ensure cross-browser compatibility and responsive design. I work closely with multidisciplinary teams to deliver cohesive and reliable software solutions.

My background includes a Master's degree in Computer Engineering from Kryvyi Rih National University. This education provides a strong foundation in engineering principles, which I apply daily to solve practical problems in web development.

I am dedicated to maintaining high standards in my work, prioritizing both performance and usability. My approach is methodical and rooted in a deep understanding of the technologies I use. I believe in continuous learning and strive to stay updated with the latest advancements in frontend development to ensure that the products I develop are both robust and scalable.
